

WARNING

REMOTE WALKING AHEAD

- Walkers are advised that the Long Hill track to the Crinoline (Mount Ligar) is not a constructed walking track but is just a walking route. More much of its length there is no track or track markers. Even though the route is not far from the Tamboritha Rd, it is up to 1,000m m higher, thus quite remote from the road with steep, demanding walking.
- There are cliffs on the Crinoline and Long Hill, often causing you to retrace your steps to find a safe route. This needs to be allowed for when calculating walking times.
- Water is often difficult or impossible to find, especially in drier times. Carry sufficient water.
- Walkers need to be fit, well equipped including map and compass and have the ability to use them, even with GPS.
- Check the forecast before you go and plan accordingly. Postpone or relocate the walk to a lower elevation if necessary.
- Plan your trip carefully, allow contingencies for unforeseen delays.
- Your equipment needs to include food, clothing, and shelter for any weather, at any time of the year. In the high country snow and blizzards can occur at any time of the year. Be prepared.
- Let someone know before you go. Make sure someone at home or elsewhere knows where you are going and when you expect to return.
- Mobile phone do not work over much of the high country. Satellite based communication devices work best.

The Crinoline (Mount Ligar)
